<sup>i</sup> The margin of sampling error for the Ward-specific surveys is +/- 3.9 percentage points (with a 95% confidence interval)

<sup>ii</sup> Poll sample sizes were 616 respondents in Ward 1, 606 respondents in Ward 3, and 613 respondents in Ward – for a total of 1,835 respondents

<sup>iii</sup> All respondents were registered Democrats in the District of Columbia

<sup>iv</sup> Some cross-tabulated data have slightly varied 'Total' calculations. This results from variations in the number of respondents who answered specific questions, adjusting for those who had "no answer" or "refused to answer." Example: roughly 5% of respondents refused to answer the question about their race, while less than .5% of respondents did not know or refused to answer the question about "right track/wrong track."

<sup>v</sup> Data for 'Favorability' ratings does not indicate answers of "no opinion," "have not heard of," or "undecided"

<sup>vi</sup> Some questions presented in this document have been truncated due to space constraints
